Claims 1-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 12 it is unclear what structure in the drawing is meant by "an extractor". Is this different from the "mechanical adjusting drive"? In claim 1, line 14 "indirectly or directly" is alternative thus rendering the claims vague and indefinite. In claim 7, line 3 "eccentric lever or eccentric levers" is alternative thus rendering the claims vague and indefinite. In claim 4, line 1 there is no proper antecedent basis for "said adapters". In claim 6, line 1 there is no proper antecedent basis for "said intermediate rings". The lack of antecedent basis in the claims renders the claims indeterminate of scope.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Osborne.

In Osborne 13,14 is a cylindrical section with gripping jaws 18, 51 is a guide tube, 71 is a mechanical adjusting drive, and 61 is a support tube.
